

The Best Part of Me!

The Best Part of Me Are My Legs...

I like my legs because they help me run in cross country and helps me in tumbling. In cross country my legs help me stride, run up hills, stretch, and walk. My legs help me in tumbling by landing, kicking over, hurdling, and having the power to jump. My legs aren't feeble, they are strong. I am **very** gingerly when it comes to my legs because if I break one, that will be the end end of cross country and tumbling. My legs are not naive. They are very experienced because I work very hard. That is the reason I chose my legs as the best part of me!
